DETAILED ACTION

Drawings

- 1. The drawings are objected to because a plurality boxes in the figures are not textually labeled. For example, in figure 1, box 10 should be labeled "Torque Sensor". These corrections are needed throughout the drawings. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
- 2. Figures 1-6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily

Application/Control Number: 09/922,738

Art Unit: 2837

published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 2, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Suzuki et al. (6,360,151).

As recited in claim 1, Suzuki et al. disclose a control unit for an electric power steering apparatus that controls a motor (14) for giving steering assist force to a steering mechanism based on a current control value calculated from a steering assist command value calculated based on the steering torque (Tm) generated in the steering shaft as disclosed in the abstract, and a current value (Im) of the motor (14), wherein the control unit (40) comprises a current dither signal generating unit (46) for generating a current dither signal when the motor angular velocity is within a predetermined range of an angular speed and for adding the current dither signal to the steering assist command value as seen in figure 7 and as discussed in column 7, lines 18-42.

As recited in claim 2, Suzuki et al. disclose the control unit for an electric power steering apparatus, wherein the predetermined value is the angular velocity of the motor corresponding to the static friction as discussed in column 1, lines 23-26 and column 6, lines 4-15.

As recited in claim 1, Suzuki et al. disclose the control unit for an electric power steering apparatus, wherein the angular velocity is obtained at a motor angular velocity estimating section (63) which inputs a motor terminal voltage and a motor current.

Allowable Subject Matter

Page 4

5. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the

base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

The following references relate to controlling the power steering via a motor to

provide a steering assist force. The references are as follows:

Nishiwaki (6,278,922)

Yamawaki et al. (6,184,637)

Endo et al. (5,801,504)

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Marlon T Fletcher whose telephone number is 703-308-

0848. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Robert Nappi can be reached on 703-308-3370. The fax phone numbers

for the organization where this application or proceeding is assigned are 703-308-7722

for regular communications and 703-308-7722 for After Final communications.
